PROFILE

Polyglot full stack engineer seeking permanent role.
Experienced in Data, Backend, and ML/AI Engineering roles.
Airdrie, AB Canadian Citizen based in Airdrie, Alberta Located in MST, available from PST to EST.

EXPERIENCE

Senior Software Engineer — Tresco Consoles

May 2026 – Present · Calgary, AB

- Reduced AWS spend by 75% by right-sizing cloud infrastructure
- Designing the company's SDLC and Agentic AI engineering workflows
- Mentoring junior engineers on system design and engineering best practices

Senior Software Engineer — Docupet

May 2023 – December 2025 · Remote, Canada

- Led major overhauls to scale a monolithic legacy application from 500,000 users to over 15,000,000, designing new systems around event-based architecture with Redis Streams
- Engineered greenfield ingestion pipelines in Python and SQL, using LLMs to normalize legacy municipal data
- Founded a Data team of two engineers to automate municipality onboarding with Python and SQL

Software Engineer — Statflo

April 2021 – May 2023 · Remote, Canada

- Founding engineer on the Data and Analytics team, owning all company data — billions of rows of text and call records
- Designed and implemented greenfield microservices consuming a central Kafka stream, processing millions of events daily
- Built CI/CD pipelines and deployment scripts for microservices using Kubernetes, ArgoCD, and GitHub Actions

Machine Learning Engineer — Helcim

May 2019 – March 2021 · Calgary, AB · Promoted from Junior Software Developer

- Founded the Data and ML team responsible for designing and implementing machine learning systems across the company
- Led development of a high-availability fraud defense system serving model inference to internal applications over REST
- As Junior Developer, architected REST APIs for a payments platform that scaled from a few thousand merchants to over 100,000

SKILLS

Languages: Python, TypeScript, JavaScript (ES6+), SQL
Backend & Data: Node.js, Redis Streams, Kafka, Data analytics, machine learning, and LLM systems
Cloud & Platform: AWS, GCP, Kubernetes, ArgoCD, GitHub Actions
Observability: Grafana, Prometheus, Loki, and Sentry

EDUCATION

Southern Alberta Institute of Technology

Calgary, AB · GPA: 3.9

Web Development

Graduated with honors. Studied Web Design and Development Fundamentals in HTML, JavaScript, and PHP.
